

## Decroline

### General

Reducing agent for discharge paste.

### Advantages

- Decroline is used in emulsion polymerization as redox catalyst.
- It is used for discharge printings in textile industry.

### Applications

- It is used at applications that metal recovery and polymeric.
- It is used to produce for high quality water-based polymerisation.

### Usage

- It is recommended to add 4-6 % in the mix which made from both D 10 Clear and D 20 White for produce the discharge paste.

### Storage & Shelf Life

- Keep containers dry and tightly closed. Store in a ventilated place between (+5)-(+30)°C /(+41)-(+86)°F of temperature.
- It should be consumed within 2 years after the production date.

### Technical Details

**Appearance**  
Powder

**Odor**  
Characteristic

**Color**  
White

**Viscosity**  
N/A

**Density**  
2,3 g/cm<sup>3</sup> (77 °F/25°C)

**pH**  
3,5 - 5,2

**Explosion Hazard**  
Not explosive

**Packaging Information**  
Decroline is packed in  
1/5/10/20/30/50 kg blue plastic  
cans.

### Important

The technical application and information that have been given above, are designed only as using instructions. Should not be considered as a warranty for any other use. When any help or assistance is required, our technical department is ready for help.

In case of emergency, Safety Data Sheet of this product should be ready for help at the working area. The warnings are given on safety data sheet of this product is for use outside the manufacturer/ distributor to direct/indirect can not be held responsible for any loss or damage.
